Lid Jarnindustri AS has supplied the Norwegian and international agricultural- and contractor- market with quality products for close to 60 years. Our company's varied history and professional knowledge, enables us to keep a constant focus on functional and dependable solutions, and has given us many satisfied and loyal customers.

DALEN Quality: Functionality, Dependability & Design

Design: The DALEN equipment is known for its rounded design. Our up-to-date machinery makes contemporary design feasible.

Functionality: Good technical solutions result in more effective and user-friendly equipment.

Effective production: Welding robots are very effective, and they are particularly used in the production of large series.

Flexibility: Our modern machinery makes us very flexible when designing products and ensures us high quality on our end products.

Knowledge: People are still the most important part of the production. Our experienced workers put our philosophy into life every day: To secure our quality-conscious customers functional equipment with good design.

Sandblast and paint: Most of the equipment from DALEN are sandblasted before it is painted. The ragged surface makes the paint stick.

Lid Jarnindustri AS also manufacture equipment for snow cleaning, road maintenance, grass- and round bale handling and lifting.
